PROFILE

I am an enthusiastic and detail-oriented Frontend Software Engineer actively seeking a remote position. I am eager to apply my skills in coding and troubleshooting complex problems, contributing to the timely completion of projects within a dynamic team.

WORK EXPERIENCE

Avonion

2021 - 2024

Junior Front-End Developer

- Development of a desktop music player: Worked on creating an application using React/Redux and Electron to manage the user interface and application state.
- SSL checker: Participated in writing the backend using NestJS, developing the landing page, and creating user interface components in React.
- Development of a browser Adblock extension: Contributed to the creation of the extension using React, worked on onboarding pages, and configured Adguard filters.
- Google Sheets parsing: Implemented an automated process for parsing data from Google Sheets.
- Web scraping: Used Playwright for automated web scraping.
- Implementation of e2e tests: Set up and implemented e2e tests using Playwright to enhance product reliability.
- Refactoring: Optimized code, improving its structure and readability.
- Working with legacy code: Managed outdated code, fixing bugs and improving system performance.
- Code review and knowledge sharing: Shared expertise with colleagues, participated in code reviews, provided feedback, and helped improve code quality.
- GitHub Workflow, testing, and release management: Experienced in setting up GitHub Workflows for continuous integration (CI), running tests, and managing product releases.
- Team collaboration: Maintained constant communication with the team, participated in task discussions, and contributed to project planning.
